

## SE Project Student's suggestions

**Student Names: (At least 3, almost 5 for the group)**

| Name                   | ID         | Name                | ID         |
|------------------------|------------|---------------------|------------|
| Khawla Hani ALmoalem   | 2230003157 | Zainab Esaeed       | 2230000664 |
| Fatimah Moayed Alawa   | 2230005350 | Zahra Aiman Alsadah | 2230004418 |
| Jood Mohammed Alzayer  | 2230002118 | Fayimah Majed Almur | 2230004016 |
| Remas Nasser Alqahtani | 2230002281 |                     |            |

**Project Proposal Title:**

Sanad platform

**General idea about the project:**

"Sanad" is a platform dedicated to encouraging people with disabilities, supporting their independence and facilitating their complete engagement in society. The platform fosters daily living and reduces barriers with a mix of accessibility, community and service offerings.

1. Accessibility Map : An interactive map of public venues (restaurants, shopping malls, schools, and hospitals) to allow users to gain details regarding their access (wheelchair ramps, adapted washrooms, availability of sign language, etc.), as well as add their ratings and reviews.
2. Community & Support : A forum for persons with disabilities to exchange advice, share experiences and build connections. The "Inspiring Stories" section highlights real success stories and motivate others.

3. Services & Appointments : Options to book remote sign language (via video calls) as well as requesting volunteer companions to assist with errands or appointments.

4. Learning & Employment : Access to online courses that are tailored for people with disabilities, as well as job matching options for inclusive job opportunities through partners.

5. Assistive Technologies Hub : A product and tool directory (screen reading applications, speech devices, mobility aides, etc.) with purchase options .

By integrating these solutions "Sanad" aims to break down barriers, promote equal opportunities, and create a society where people with disabilities can thrive in education, work, and daily life.
